Internet Banking: Corporate Admin User Manual

1. Corporate Menu:

Logging in for the first time:

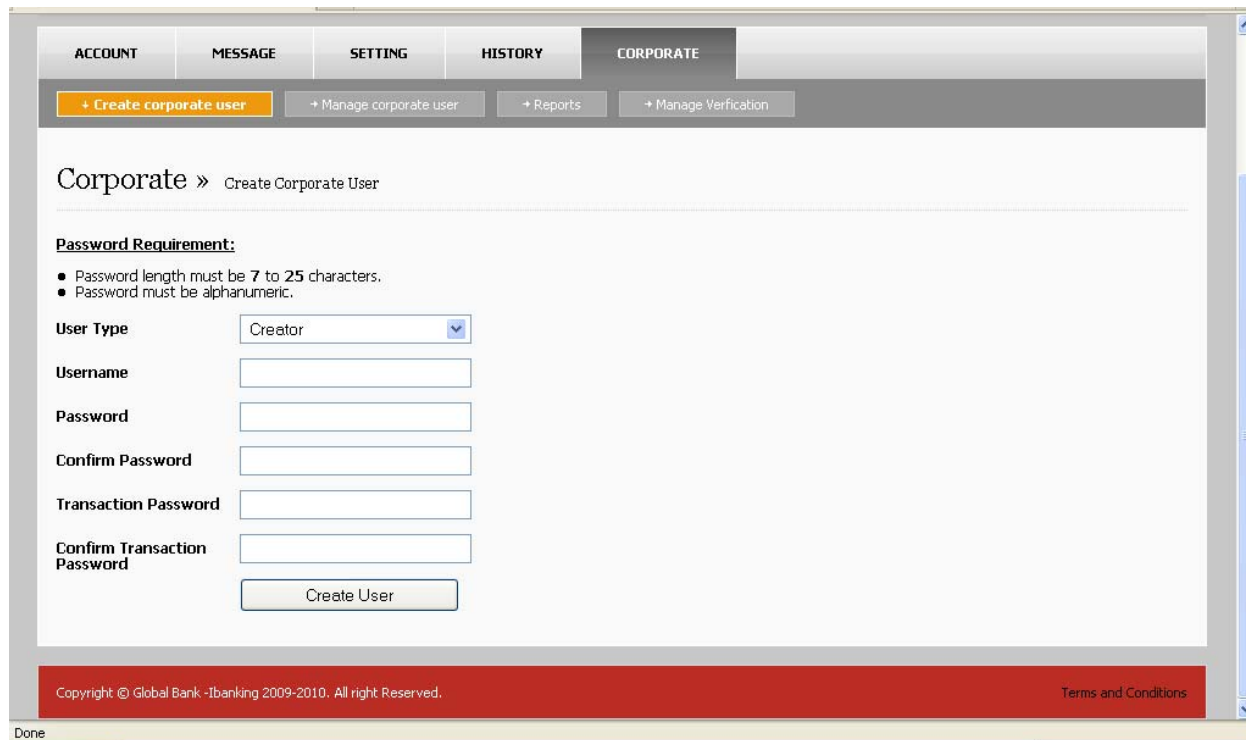

When a corporate admin user logs for the first time, this user has to accept Terms and Conditions of online banking. The user is required to change login password. After this the user needs to login again with the new password to use online banking.

Using corporate menu:

This is the main menu for Corporate Internet Banking. Under this menu, the corporate admin can create corporate transaction creators / verifiers / normal users, change menu access to existing users, block and unblock users, and see transaction activity reports.

2. Corporate - > Create corporate user:

Under this menu, the corporate admin can create three types of users. These users are corporate transaction creator, corporate transaction verifier, and normal i-banking user.

The screenshot shows the 'Create Corporate User' form within the 'CORPORATE' menu. The form includes a navigation bar with tabs: ACCOUNT, MESSAGE, SETTING, HISTORY, and CORPORATE. Below the tabs are buttons: '+ Create corporate user' (highlighted), '+ Manage corporate user', '+ Reports', and '+ Manage Verification'. The form title is 'Corporate » Create Corporate User'. Under 'Password Requirement:', it lists: 'Password length must be 7 to 25 characters.' and 'Password must be alphanumeric.'. The form fields are: 'User Type' (dropdown menu with 'Creator' selected), 'Username', 'Password', 'Confirm Password', 'Transaction Password', and 'Confirm Transaction Password'. A 'Create User' button is at the bottom. The footer contains 'Copyright © Global Bank -Ibanking 2009-2010. All right Reserved.' and 'Terms and Conditions'.

Internet Banking: Corporate Admin User Manual

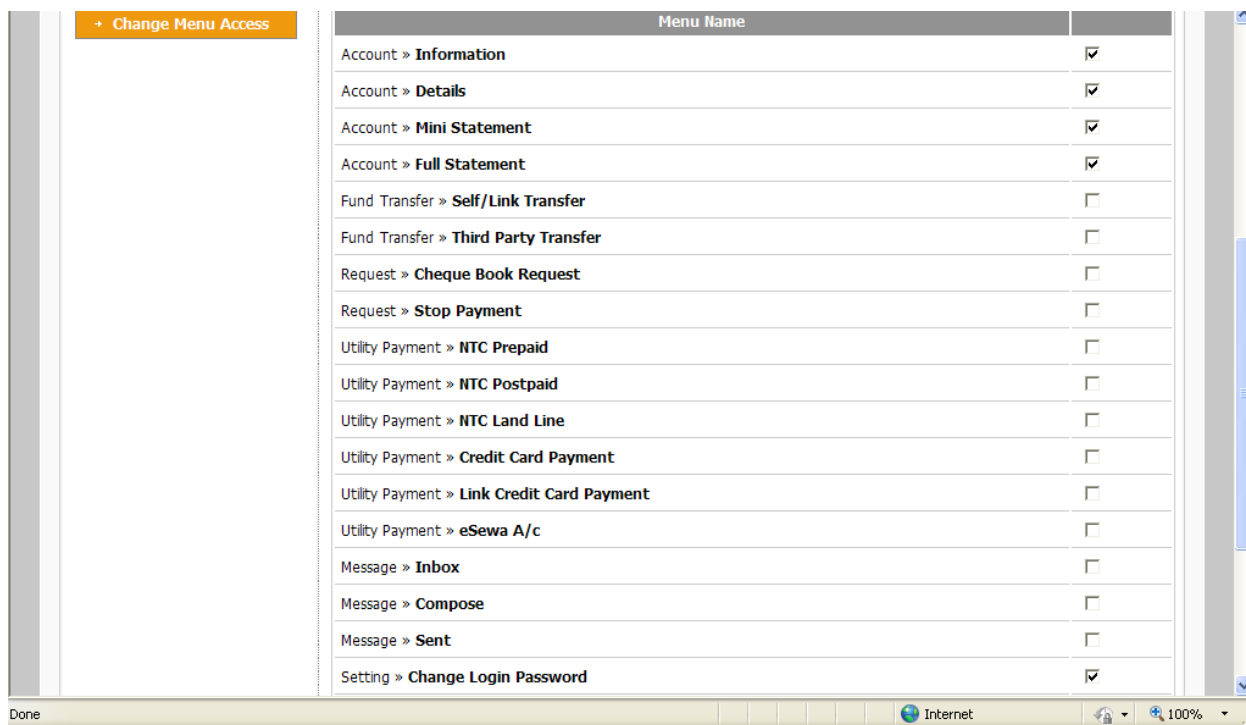

- User Type:** Select “Creator” or “Verifier” or “Normal” from the list.
- Username:** This is the username assigned to a user. **The username must be an email address.** If this is a valid email address, then creator and verifier users will get automatically generated email notifications whenever they initiate or verify transactions.
- Password:** This is the login password. The password must be 7 to 25 characters and must be alphanumeric.
- Confirm Password:** This is to confirm login password again.
- Transaction Password:** This is the transaction password. This can be same as login password. However, for added security measures, it is recommended that this password be different than the login password. Like login password, this password also must be 7 to 25 characters and must be alphanumeric.
- Confirm Transaction Password:** This is to confirm transaction password again.

Once these parameters are entered, press **Create User** to create a new user.

Internet Banking: Corporate Admin User Manual

3. Assigning menu to new user:

After the creator has pressed Create User, the new user is not yet created. The creator has to assign menus to the new users. The creator can check or uncheck menu items that are to be assigned to the new user and then press **“Create User”** to commit.

The screenshot shows a web application window titled "Change Menu Access". On the left, there is a sidebar with a button labeled "+ Change Menu Access". The main area contains a table with the following columns: "Menu Name" and a checkbox column. The table lists various menu items, some of which are already checked.

Menu Name	
Account » Information	<input checked="" type="checkbox"/>
Account » Details	<input checked="" type="checkbox"/>
Account » Mini Statement	<input checked="" type="checkbox"/>
Account » Full Statement	<input checked="" type="checkbox"/>
Fund Transfer » Self/Link Transfer	<input type="checkbox"/>
Fund Transfer » Third Party Transfer	<input type="checkbox"/>
Request » Cheque Book Request	<input type="checkbox"/>
Request » Stop Payment	<input type="checkbox"/>
Utility Payment » NTC Prepaid	<input type="checkbox"/>
Utility Payment » NTC Postpaid	<input type="checkbox"/>
Utility Payment » NTC Land Line	<input type="checkbox"/>
Utility Payment » Credit Card Payment	<input type="checkbox"/>
Utility Payment » Link Credit Card Payment	<input type="checkbox"/>
Utility Payment » eSewa A/c	<input type="checkbox"/>
Message » Inbox	<input type="checkbox"/>
Message » Compose	<input type="checkbox"/>
Message » Sent	<input type="checkbox"/>
Setting » Change Login Password	<input checked="" type="checkbox"/>

The bottom of the window shows a status bar with "Done" on the left, "Internet" in the center, and "100%" on the right.

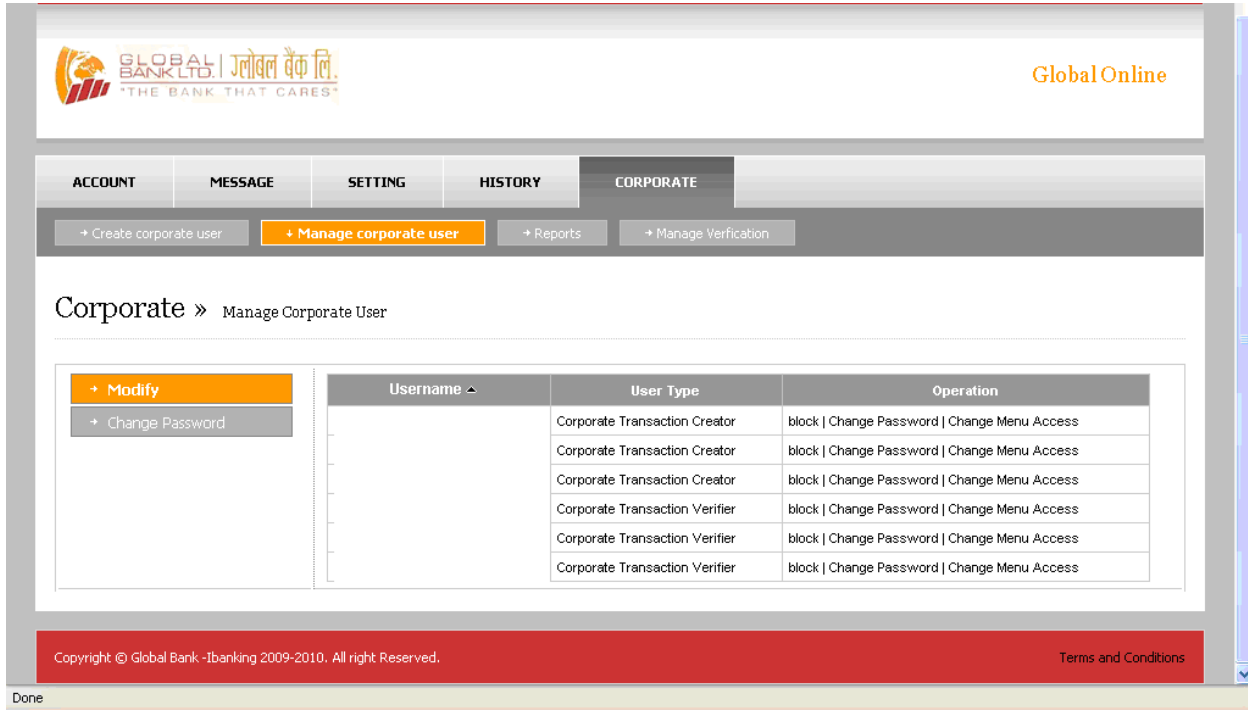

3. 1. Notifying New User about Creation of his/her User Account:

A new creator, normal, or verifier user created by corporate admin does not automatically get notified by Global bank about creation of online banking account. This is because these users are created by corporate admin. Therefore, the corporate admin must notify these users about their account creation.

Internet Banking: Corporate Admin User Manual

4. Corporate - > Manage corporate user:

This menu allows changing password of current creator/normal/verifier users, blocking/unblocking such users, and also allows changing menu access of such users.

Change Password: When this link is clicked, login and transaction password for an existing creator/normal/ verifier user can be changed.

Internet Banking: Corporate Admin User Manual

The screenshot shows the 'Corporate' section of the internet banking interface. The 'Change Password' form is displayed, which includes a sidebar with 'Modify' and 'Change Password' options. The main form area contains a 'Password Requirement' section with two bullet points: 'Password length must be 7 to 25 characters.' and 'Password must be alphanumeric'. Below this is a 'Username' field, a 'Password Type' dropdown menu (currently set to 'Login Password'), and two text input fields for 'New Password' and 'Confirm Password'. At the bottom of the form are two buttons: 'Change Password' and 'Cancel'.

Here,

Username:

If the corporate admin has already created corporate creator, normal, and verifier user(s), then the admin will be able to select such user from the list.

Password Type:

The admin can select "Login Password" or "Transaction Password" from the list.

New Password:

The new password must be typed here.

Confirm Password:

The new password must be confirmed here.

Once the form is filled; the corporate admin can do one of the following,

Click on **Change Password:**

This will change the login or transaction password of the selected user.

Click on **Cancel:**

This will cancel the change password process.

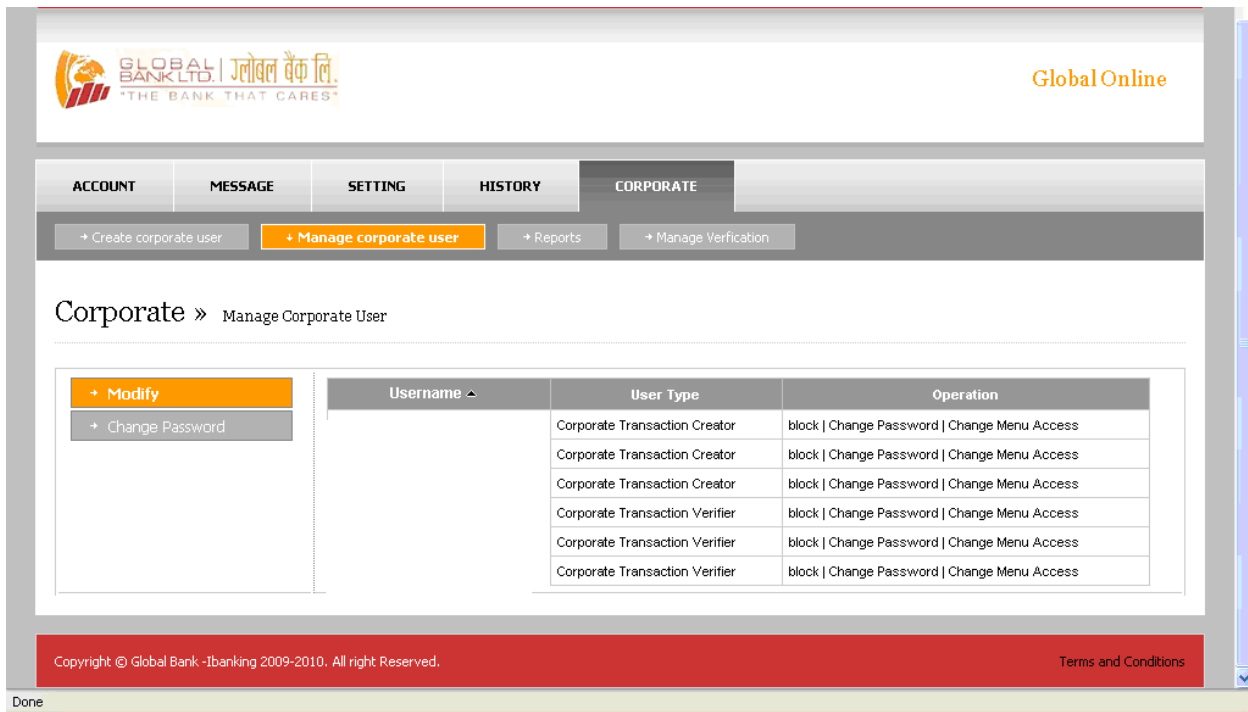

Note:

The corporate admin cannot change self account password here. This menu is to change login and transaction password of other users. The corporate admin must use "**Settings**" menu to change his/her password.

Internet Banking: Corporate Admin User Manual

Corporate -> Manage Corporate User (continued)

Now, on the main **Manage corporate user** screen, the admin can see the list of creator and verifier users for the corporate account.

The screenshot displays the 'Manage Corporate User' screen. At the top, there is a navigation bar with tabs: ACCOUNT, MESSAGE, SETTING, HISTORY, and CORPORATE. Below the tabs, there are buttons: '+ Create corporate user', '+ Manage corporate user' (highlighted), '+ Reports', and '+ Manage Verification'. The main content area shows a breadcrumb 'Corporate » Manage Corporate User'. On the left, there are buttons: '+ Modify' (highlighted) and '+ Change Password'. The main table has three columns: Username, User Type, and Operation. The table lists six users, all of whom are 'Corporate Transaction Creator' or 'Corporate Transaction Verifier'. The 'Operation' column for each user contains links: 'block | Change Password | Change Menu Access'.

Under User Type column, the corporate admin can see the type of corporate user, which is one of the following: Corporate Transaction Creator, Normal I-Banking User, and Corporate Transaction Verifier.

The admin can do one of the following for each user.

Block/Unblock:

When this link is clicked, the corresponding user account will be blocked. Please note that the corporate admin cannot delete a user account, he/she can only block it. To unblock a given user account, the admin can click unblock link that appears next to a blocked account.

Change Password:

This feature has already been discussed above.

Change Menu Access:

Upon clicking on this link, the corporate admin can see the current internet banking menu access given to a creator or verifier user.

Done Internet 100%

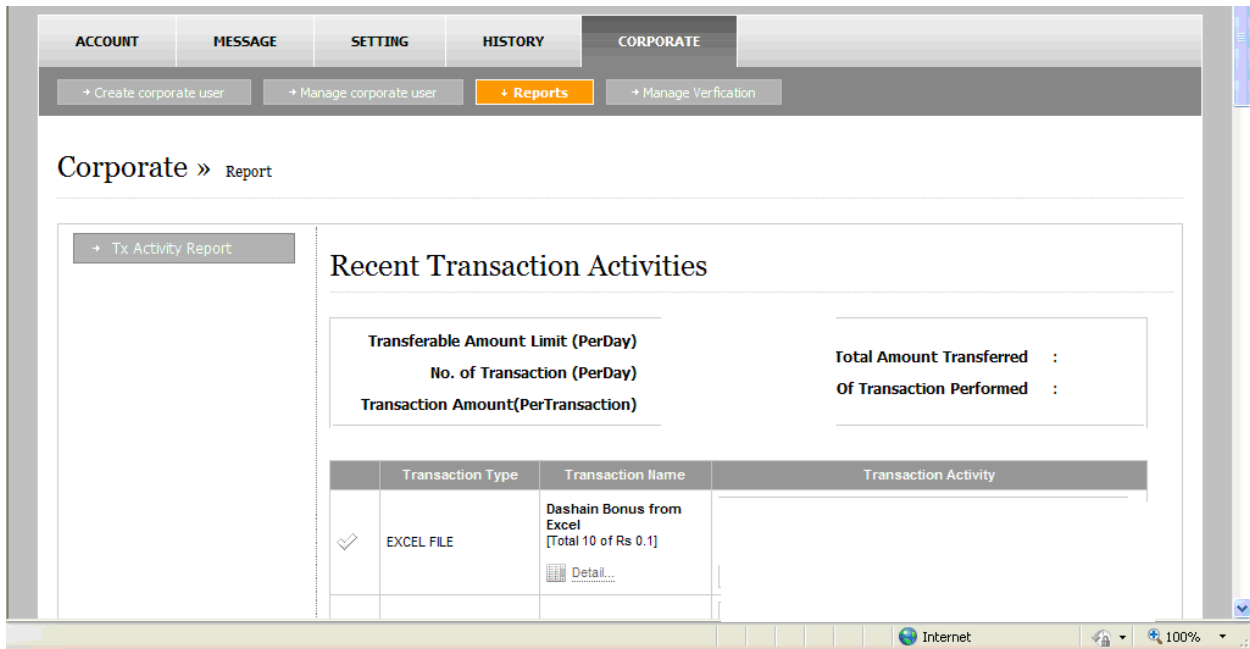

The admin can check or unchecked menu items as required and the press **Modify** to commit changes. The corresponding user, whose menu was modified, can see the changes after next login.

Internet Banking: Corporate Admin User Manual

5. Corporate -> Reports:

Under this menu, the corporate admin can see transaction activity reports. The list of reports is sorted in the order newest first. That is, the transaction that was modified most recently appears on the top.

In this page, the corporate admin can also see the daily transaction limits imposed by GlobalOnline administrator and the number of transactions as well as total amounts transferred in today's transactions.

The screenshot displays the Corporate Admin interface with the 'CORPORATE' tab selected. Below the navigation bar, there are buttons for '+ Create corporate user', '+ Manage corporate user', '+ Reports' (highlighted), and '+ Manage Verification'. The main content area shows 'Corporate » Report' with a sidebar containing '+ Tx Activity Report'. The main section is titled 'Recent Transaction Activities' and contains a summary box with the following information:

Transferable Amount Limit (PerDay)	Total Amount Transferred :
No. of Transaction (PerDay)	Of Transaction Performed :
Transaction Amount(PerTransaction)	

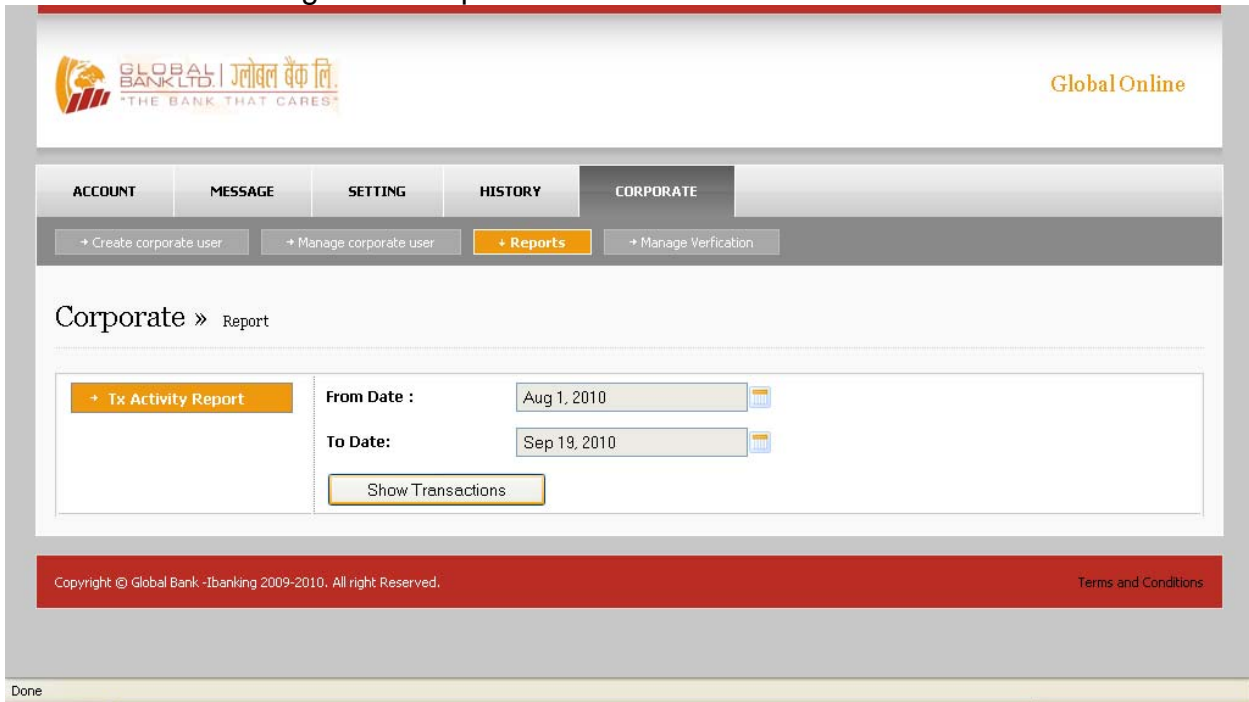

Below the summary box is a table with the following columns: Transaction Type, Transaction Name, and Transaction Activity.

Transaction Type	Transaction Name	Transaction Activity
EXCEL FILE	Dashain Bonus from Excel [Total 10 of Rs 0.1]	
	Detail...	

The browser's address bar shows 'Internet' and the zoom level is set to 100%.

5. 1. Corporate - > Report -> TX Activity Report:

Alternately, the corporate admin can click this link called “**Tx Activity Report**” to see transactions occurring within a specified time frame.

The screenshot displays the Global Bank Ltd. Corporate Admin interface. At the top, the bank's logo and name are visible. Below the navigation bar, the 'CORPORATE' tab is selected. Under this tab, there are four buttons: '+ Create corporate user', '+ Manage corporate user', '+ Reports' (highlighted in orange), and '+ Manage Verification'. The main content area shows the 'Corporate » Report' section. On the left, there is a button labeled '+ Tx Activity Report'. To the right of this button, there are two date selection fields: 'From Date : Aug 1, 2010' and 'To Date: Sep 19, 2010'. Below these fields is a 'Show Transactions' button. At the bottom of the interface, there is a red footer bar containing the copyright notice 'Copyright © Global Bank -Ibanking 2009-2010. All right Reserved.' and a link to 'Terms and Conditions'.

Here,

From Date: The date from which the report is to be started.

To Date: The date to which the report is to be stopped at.

The admin can click on calendar icon next to the From/To Date data field and select appropriate date from the calendar.

Then, the admin can click on “**Show Transactions**” that will show a report of all transactions that happened during the specified timeframe.

For both Recent Transaction Activity and Tx Activity Report, the corporate admin can click on **Detail...** link which appears in a transaction to see details of a given transaction.

Internet Banking: Corporate Admin User Manual

Tx Activity Report			
Transaction Activities from Aug 1, 2010 to Sep 19, 2010			
	Transaction Type	Transaction Name	Transaction Activity
✓	SALARY TEMPLATE		
✓	EXCEL FILE		
✓	SALARY TEMPLATE		
	SALARY TEMPLATE		
✓	SALARY TEMPLATE		

Here, the admin sees an icon next to a transaction. The icon represents the state of a transaction.

There are three types of icons that exhibit three states of a transaction.

This icon tells that a transaction is pending. That is, a transaction has been initiated, but it has not been committed or rejected.

This icon tells that the transaction has already been rejected.

This icon tells that the transaction has already been verified by required number of verifiers and has been committed.

6. Corporate - > Manage Verification:

In this menu, there is a parameter called **Verifications Required**. The number here determines when a transaction is committed. In other words, it is the number of times a transaction needs to be verified (one verifier verifying a transaction only once) in order for the transaction to commit.

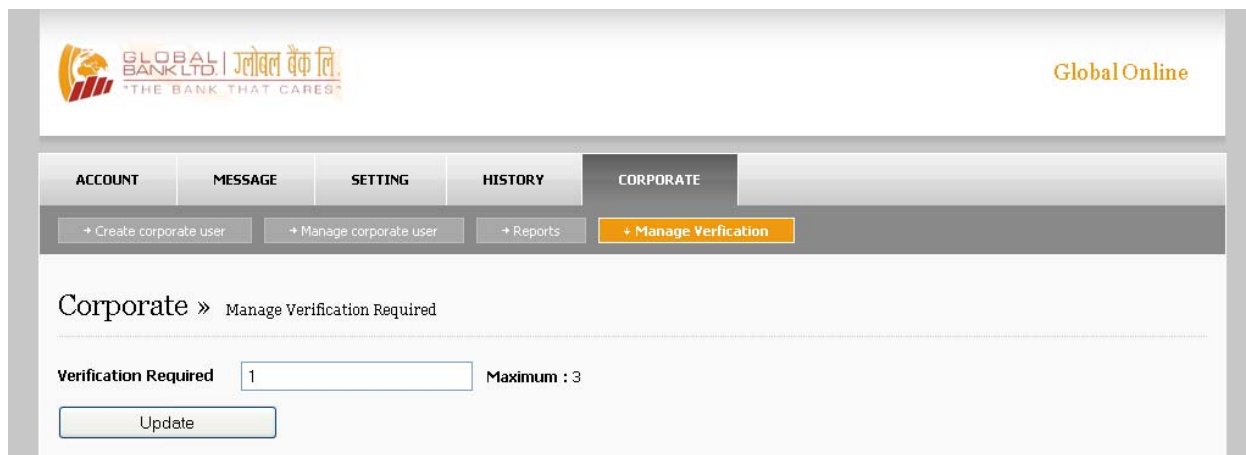

By default, when a new corporate account is created, the value for **Verifications Required** will be 0. The admin can change this value and then start creating users.

The minimum value for this field is 0. When this field is set to 0, a transaction created by a creator immediately gets committed. Thus, in this scenario, a verifier user does not need to verify a transaction.

The maximum value for this field is equal to the number of verifier users active in the system. For example, the corporate admin has created 4 verifier users. Then, the admin can set maximum value for this field to 4. This maximum limit is enforced because a verifier can verify a transaction only one time. If "**Verifications Required**" is greater than the number of verifier users, then a transaction may never get committed despite being verified by all verifier users.

The corporate admin can update this Verifications Required field between 0 and maximum limit imposed by the system.

To update Verifications Required field, enter a number on the form and press **Update**. All transactions that are initiated after this update will carry this Verifications Required parameters and these transactions will commit only after reaching the required number of verifications.

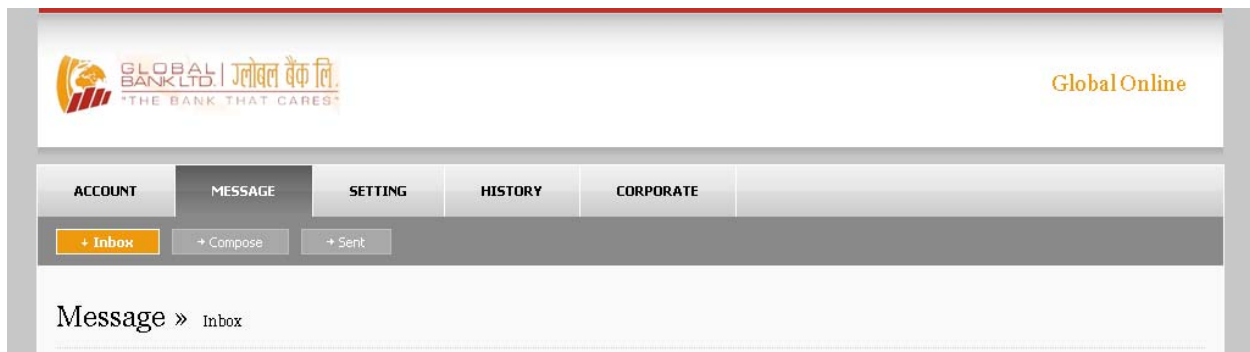

The screenshot displays the Global Bank Ltd. Corporate Admin interface. At the top, the bank's logo and name are visible, along with the tagline "THE BANK THAT CARES". The navigation menu includes ACCOUNT, MESSAGE, SETTING, HISTORY, and CORPORATE. The CORPORATE menu is active, showing options like "+ Create corporate user", "+ Manage corporate user", "+ Reports", and "+ Manage Verification". The "+ Manage Verification" option is highlighted. Below the navigation bar, the page title is "Corporate » Manage Verification Required". The main form area contains a "Verification Required" field with a value of "1" and a "Maximum : 3" label. An "Update" button is located below the field.

7. Message:

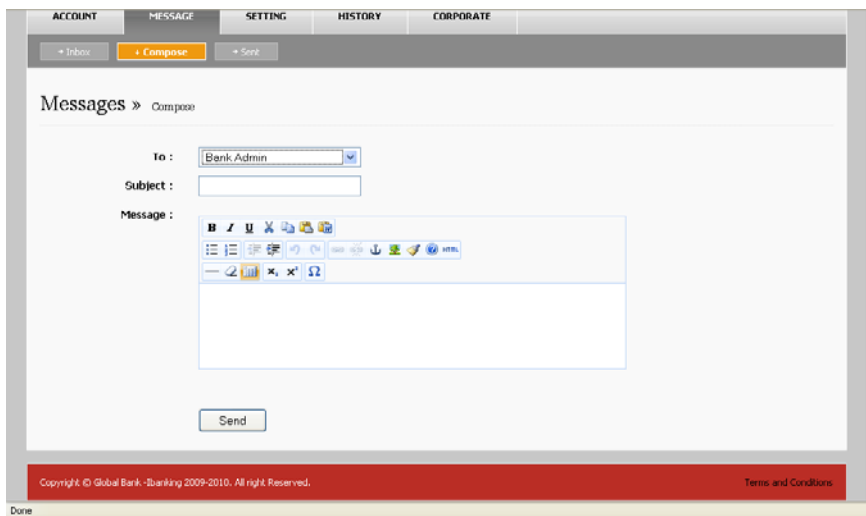

If the message menu is enabled for corporate admin account, this user will be able to send and receive message to/from.

- Global Bank Online Banking Administrator
- All Creator, Normal, Verifier users created by this corporate admin user.

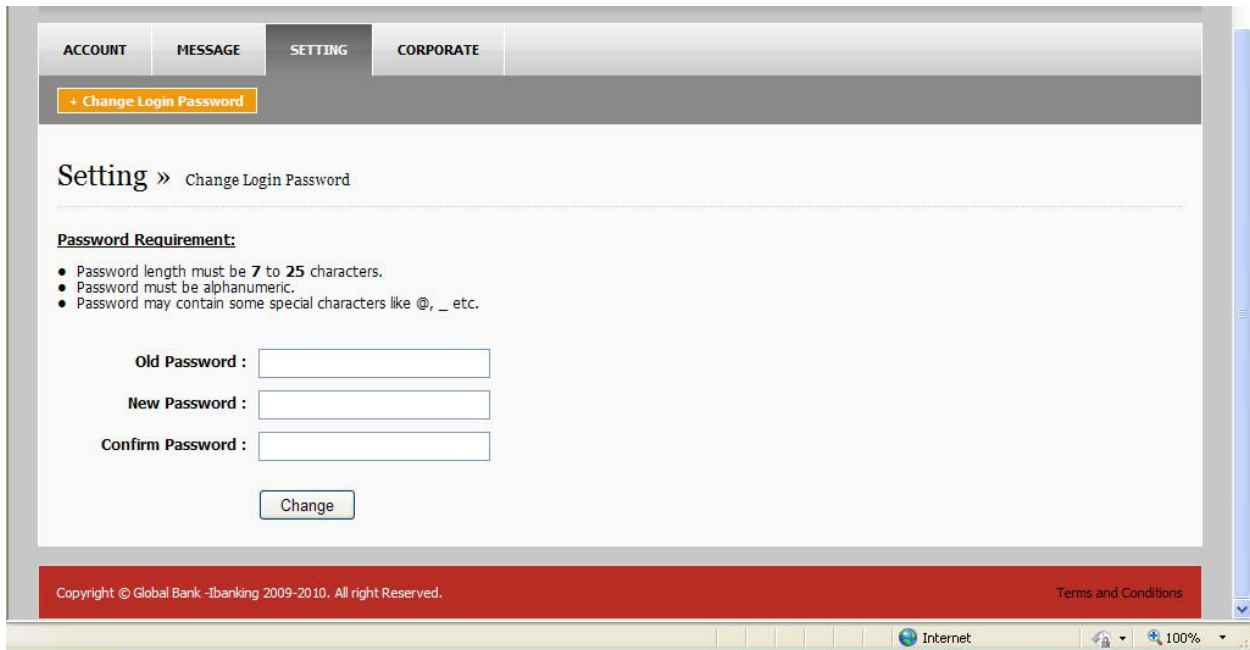

The default menu under Message is Inbox where the admin can view message sent by other users. Similarly all messages sent by the admin can be see on **Sent** menu. The user can click delete link next to a message to remove the particular message from the system.

To compose a message, click **Compose**. Then select a name from the list, write the subject, write the message, and click **Send**.

8. Procedure to Change Login Password:

If the corporate admin's user account has **Setting** menu enabled, the admin user can change his/her internet banking account's login password. Please note that the admin user does not have authority to do transactions. Therefore, the admin user will not receive and also will not be able to change transaction password.

The screenshot displays the 'Change Login Password' page within the Global Bank Internet Banking Corporate Admin User Manual. The page features a navigation bar at the top with tabs for ACCOUNT, MESSAGE, SETTING, and CORPORATE. Below the navigation bar, there is a button labeled '+ Change Login Password'. The main content area is titled 'Setting » Change Login Password'. Under the heading 'Password Requirement:', there are three bullet points: 'Password length must be 7 to 25 characters.', 'Password must be alphanumeric.', and 'Password may contain some special characters like @, _ etc.'. Below these requirements, there are three input fields labeled 'Old Password:', 'New Password:', and 'Confirm Password:'. A 'Change' button is located below the input fields. At the bottom of the page, there is a red footer bar containing the text 'Copyright © Global Bank -Ibanking 2009-2010. All right Reserved.' and a link to 'Terms and Conditions'.

9. Corporate Admin - Questions and Answers:

How to create a new user?

The corporate admin can create new creator, normal, and verifier users by using the menu option **Create corporate user**.

How to change user login and transaction password?

The corporate admin can change own account's login password by using Settings menu under general internet banking. To change other user's password, the corporate admin must use **Manage corporate user** menu.

How to block and unblock a user?

The Corporate Internet Banking portal does not allow deletion of an existing creator, normal, or verifier user. However, it does allow blocking of a user account. The admin can use **Manage corporate user** menu to block a corporate user account. The admin may later decide to unblock this account. To do this, the admin can use the same **Manage corporate user** menu to unblock an existing user account.

What is Verifications Required field?

The verifications required field denotes a number that needs be reached for a transaction to be committed. If this number is set to one, which means after one verifier user has approved a transaction that the transaction gets committed. If this number is set to zero, then a transaction immediately gets committed when a creator user initializes the transaction.

What is the limit on Verifications Required field?

The minimum value for this field is zero. The maximum value for this field is equal to the number of verifier users active in the system. For example, if the corporate admin has created three verifier users, then the maximum value for Verifications Required field is three. The corporate admin can assign values of zero, one, two, and three in this scenario.

Why is Verifications Required field even required?

Many organizations may not want a transaction to be committed immediately when it is initiated. They may want at least one level of verification. That is, they may want additional user to verify that all entries in a given transaction are correct before the transaction gets committed. Organizations that want more than one level of verification can create multiple verifier users, set **Verifications Required** field to the maximum allowed, and have all verifier users verify a transaction for it to commit.

Can a transaction be immediately committed directly without verifications?

Yes, this can happen when the admin changes **Verifications Required** to zero. All new transactions get committed immediately when they are initiated by creator user.

Why cannot the corporate admin create or verify transactions?

The role of corporate admin is solely to create new creator, normal, and verifier users, change **Verifications Required** field, and monitor progress of transactions.

How to monitor progress of existing transactions?

The corporate admin can use menu **Reports** to see a list of recent transactions. All transactions will be listed on newest first order. Transactions that are pending (initiated but not committed), and transactions that are already closed (committed or rejected) will be displayed.

How to see transaction history for all transactions?

The admin can also use **Tx Activity Report** menu to see a list of transaction activities within a specified time frame. The admin can click on **Detail...** link on each transaction to view its details.

Why does the Corporate Admin see multiple transactions in mini or full statement for one corporate transaction?

A corporate transaction has N accounts be credited. When it commits, the corporate admin will see N transactions in account mini/full statement. This is because when a corporate transaction is processed, it commits one account at a time. That is, for every transaction, the operative account will be debited and the account to be credited is credited with the amount specified for that transaction.
